

VACANCY: WEB DEVELOPER

AWESOMENESS WANTED!

ARE YOU?

An Ambassador: Have a positive attitude and represent who we are. We're changing lives all over the world.

Customer Obsessed: You truly enjoy helping people and enjoy that one-on-one interaction.

Quick: You like to be busy, own and manage your responsibilities and keep the day moving along.

A Techie: You are skilled with programming web pages, APIs, and system development.

This is a full time mid-level position in a fast paced environment. This position includes professionalization in: web and program development with systems and workflows.

We are constantly innovating and developing new systems and workflows to enhance the customer experience and improve internal processes.

This is an exciting, dynamic and essential role for our company's success!

JOB DUTIES...

- > **Develop and maintain web-based interfaces, both external and internal facing, combining purchased and custom systems to facilitate our eCommerce business and Production workflows.**
 - > **Develop and maintain web service API communications between our systems and 3rd party systems.**
 - > **Automate internal processes to streamline production and data management**
-

This position requires 3 years of experience developing web portals on the Microsoft platform with strong knowledge of .NET, ASP, HTML5, CSS, JavaScript, Vbscript and RESTful API modalities utilizing Json and XML file formats.

HubSpot and vBulletin development experience is preferred, but not required. Also, working knowledge of SQL Server, MySQL and MS Access database platforms as well as VBA programming knowledge are preferred, but not required.
